Cleveland Landmarks Commission

Cleveland Architects Database

The Cleveland Architects Database was envisioned as a comprehensive listing of Cleveland's rich history of buildings and the architects who designed them. It provides an extensive look at the output of buildings in the careers of Cleveland's architects to help us further recognize and evaluate their bodies of work, whether well-known or unheralded. A resource for architects, historians, planners, students, and property owners, the Database is a product of the Landmarks Commission's mandate to conduct a continuous survey of Cleveland's architectural heritage.

The Database covers the history of Cleveland's built environment, primarily up to the 1940s. It is our intention to expand the Database to include more buildings and architects from the latter half of the twentieth century. And though the focus of the Database is on architects from Cleveland and the work they produced, more entries will be added for architects from elsewhere who designed significant buildings here.

The Database went online in June of 2008, and it continues to be updated, corrected, and refined. It is not a finished document, but rather a work in progress that will continue to grow and evolve. We welcome documented additions and corrections.

Award

In 2014, the Cleveland Restoration Society recognized former Landmarks Commission Secretary Robert Keiser and the Cleveland Architects Database with a Cultural Resource Award at the 2014 Celebration of Preservation.

Acknowledgments

Robert Keiser, who conducted research for the Commission from 1983 to 2014, and architectural historian Craig Bobby are the primary contributors to its compilation, research, and editing. Additional credit belongs to those who have contributed information over the years or whose research from other projects was incorporated into the Database.

Clarence Oliver Arey

Birth/Established May 18, 1857

Death/Dissolved August 11, 1896

Biography:

Clarence O. Arey was a Victorian-era architect born in Buffalo, New York who had successful careers in both architecture and medicine. He graduated from the University of Michigan in Civil Engineering and settled in Cleveland as an architect by 1881, with an office in the Blackstone Block. He lived in a home he designed at 1854 East 79th Street. As an architect he had several major commissions including the Case School Gymnasium and School of Applied Science. He also designed two Euclid Avenue mansions. Three of his commissions were featured in the "Inland Architect," a notable architectural periodical of the time. His career occurred prior to the issuance of building permits by the City of Cleveland, thus much of his work remains unidentified. Upon the death of a son from diphtheria, he pursued a course in medicine at the University of Pennsylvania. He returned to Cleveland, studying the different forms and causes of diphtheria. He died at the age of thirty-nine, leaving a widow and two small children. He is buried in Lakeview Cemetery.

Sidney Rose Badgley

Birth/Established May 28, 1850

Death/Dissolved April 28, 1917

Biography:

Sidney R. Badgley was born in Earnstown, Ontario. His family later moved to the Niagara region of Ontario. His father was engaged in the lumber, general manufacturing and building business. Sidney Badgley began his career by making construction plans for his father's business. The family later moved to St. Catharines, Ontario, where he attended the Grantham Academy. He was married twice. He went to work in the office of Toronto architect R. C. Windeyer where he designed Massey Hall, a major concert hall. He later moved back to St. Catharines, where he served two terms as an alderman. After extensive travel in the United States and Canada, he settled in Cleveland in 1887. His practice became known as a prolific architect of churches. In Cleveland he was a member of the Chamber of Commerce and the Civil Engineer's Club. He was a firm believer in the union of Canada and the United States. In Cleveland he designed numerous churches including St. Timothy Missionary Baptist Church, Pilgrim Congregational Church, Scranton Avenue Baptist Church, and St. John's Presbyterian Church. He was also the architect of the Georgian Revival style Jones Home for Children. From 1903 to 1913 he formed a partnership with William H. Nicklas. His buildings are found throughout the United States and Canada. In 1907 he visited Athens, Naples, Rome, Florence, Venice, Milan, Geneva, Cologne, Berlin, Paris and the British Isles. While he was abroad he made a special study of Old World Cathedrals. He was a member of the Methodist Church. He died at his home at Springbrook Farm in Willoughby, Ohio in 1917 and was buried in Victoria Cemetery in St. Catharines, Ontario.

Frederick Baird

Birth/Established September 23, 1867

Death/Dissolved February 16, 1920

Biography:

Frederick Baird was born in Bangor, Maine and came to Cleveland with his family at the age of three. He was a graduate of West High School in Cleveland. After graduation he went to work in the office of Charles Schweinfurth, as he pursued his studies, for three and a half years. He later went to work for Coburn & Barnum and then became foreman and designer for Lehman and Schmitt. While with that firm he designed many residences, courthouses, and other buildings throughout the country. He married Mamie Zangerle, the sister of county auditor John A. Zangerle. In 1898 he set up an office in the American Trust Building. A motto taken from Longfellow hung over his desk:

"In the older days of art / Builders wrought with greatest care / Each minute and unseen part / For the gods see everywhere."

He designed a wide variety of structures, including houses, terraces, apartments, and commercial buildings. He designed the Salvation Army Citadel Building, the first reinforced concrete constructed building in Ohio. He submitted two drawings for the proposed Forest City Savings Bank Building on the corner of West 25th Street and Detroit Avenue, although neither of his designs was chosen. Steffens, Searles & Hirsh eventually won the contract. His most famous building is St. Theodosius Russian Orthodox Cathedral in the Tremont neighborhood. He was a member of the Cleveland Architectural Club.

In 1917, he announced his retirement and traveled to Japan, China, Hong Kong, Korea and Manchuria. He died on February 16, 1920 of cancer and is buried in Lake View Cemetery.

Fenimore C Bate

Birth/Established 1857

Death/Dissolved June 27, 1903

Biography:

Fenimore C. Bate was born in Cleveland. He first appears in the 1876-7 Cleveland City Directory as a draftsman working for architect Walter Blythe. In 1883, he was a draftsman and, the following year, an architect for the Cleveland Water Works Department. By 1885 he was in business for himself as an architect. He was the architect of numerous houses for the middle and upper middle classes as well as of commercial buildings at a time when Cleveland's population was booming. His works were well documented in the architectural journals of the time. Several significant examples of Bate-designed Queen Anne houses survive. These include the Schellentragger House (built 1893), 690 Lakeview Road; the Henry Trenkamp House (1894-5), 1905 East 89th Street; and the Latham Brightman House, now the Holmes County Historical Society (1901) in Millersburg, Ohio. His houses were built throughout Cleveland, northeast Ohio cities and towns, including Fremont and Toledo, and Indianapolis, Indiana. An article in the March 17, 1888 "Cleveland Town Topics" magazine said that Bate-designed homes "all show a refreshing departure from the stereotyped styles of a few years ago". He is best known as the architect of the Romanesque Revival-style Cleveland Grays Armory (1893), 1234 Bolivar Road. He was also a member of the Cleveland Grays.

Later in his career he designed more tenement or apartment buildings, a popular building type in turn-of-the-century Cleveland. Architect Edward E. Smith was a draftsman who worked for Fenimore Bate from 1889 until 1894. Throughout Bate's career he designed commercial and industrial buildings. The Megerth Block (1892-3), 8620 - 6 Cedar Avenue, and the addition to the Standard Lighting Building (1895), 4419-37 Perkins Avenue, are two extant commercial-industrial use buildings designed by Bate. He was also the architect of several hotels and hotel additions, though apparently none of those survive. There is an article in the September 22, 1900 issue of the "Interstate Architect" that states that Bate was injured in an accident in his office where he dropped a battery with acid striking him in the face and neck causing him temporary blindness. After a period of failing health, Fenimore Bate died on June 27, 1903 at the age of forty six of apoplexy at home in his New Amsterdam apartment. He was buried in Lake View Cemetery. He left his estate to his wife Helen, including property that he owned on East 20th Street occupied by the Fenimore Apartments.

He married Florida Geneva Heard, the daughter of architect Charles Heard. He learned the avocation of stone-cutter from his father-in-law. He later became a draftsman and then an architect. He was a veteran of the Forty-first Ohio Volunteers regiment during the Civil War. Immediately after the war, from 1866 to 1871, he was a partner in the firm of Heard and Blythe. Forrest Amos Coburn was born in Lowell, Massachusetts. He moved to Cleveland's West Side with his parents at the age of fourteen. He worked as a bookkeeper for the firm of Woods, Perry and Company lumber dealers after high school. He developed a talent for architecture while working for that firm. From 1868 to 1871 he worked for architect Joseph Ireland, then in the office of architect Walter Blythe. He then went to New York to complete his study of architecture where he worked in the office of Richard Morris Hunt. He returned to Cleveland in 1877 and went into partnership with Frank S. Barnum in 1878. They were a very successful firm; the vast majority of their work was residential. They were also the architects of several churches in Cleveland and surrounding communities, including a large number of Congregational Churches. These included the Euclid Avenue Congregational Church at 9606 Euclid Avenue (1887), the Franklin Avenue Congregational Church at 5720 Franklin Boulevard (1883), and the Olivet Baptist Church, as well as several buildings for Case Tech and Western Reserve University, and commercial buildings. He was secretary of the Civil Engineer's club and a member of the veteran's society of Troop A. His death was brought on by over work. He was sick the last four months of his life. At the time of his death he lived at 6016 Franklin.

Biography:

Coburn and Barnum was one of the most important architectural firms in late 19th century Cleveland. They designed over twenty houses along Euclid Avenue's Millionaires Row, several buildings for Case Institute of Technology, Western Reserve University, and Oberlin College, and large commercial buildings including the Blackstone Power Block. They designed several churches including the Euclid Avenue Congregational Church, the Franklin Avenue Congregational Church, the Olivet Baptist Church, and Trinity Baptist Church. Beyond Cleveland they had commissions in Oberlin, Delaware, and Ashland, Ohio, and Palm Beach, Florida. The office staff included Benjamin Hubbell, W. Dominck Benes, John Edelmann, Albert Skeel, Frank Hall, and Herbert Briggs. The firm would become Coburn, Barnum and Benes, when W. Dominick Benes was made partner, and became Coburn, Barnum, Benes, and Hubbell when Benjamin Hubbell became a partner. The firm dissolved when Forrest Coburn died in 1897. Several of the firm's architectural plans can be found at the Western Reserve Historical Society library.

John William Cresswell Corbusier

Birth/Established October 31, 1877

Death/Dissolved June 8, 1928

Biography:

John William Cresswell Corbusier was a native of Rochester, New York and a graduate of the Mechanics Institute who gained practical experience in Buffalo, New York and New York City, where he worked in the office of Cass Gilbert. He became the lead draftsman in the office of H.V.B. Magonigle who won the competition for the McKinley Memorial in Canton. While in this office he won the gold medal of the New York architectural league. He married the daughter of H. F. Lyman of the Upson-Walton Company. He spent two years in Paris after his marriage, where he continued his study of the gothic cathedral. Upon his return to the United States, he settled in Cleveland, associating with Ralph Adams Cram in erecting the Church of the Covenant, and with Henry Vaughn on the Flora Stone Mather Chapel of Adelbert College. He later went into partnerships with George S. Page and then with William E. Foster. He was a noted church architect. He moved to Hudson in 1911 where he was instrumental in early historic preservation efforts, designing several structures that fit into the character of the early Western Reserve architecture of the town. He was an accomplished singer and was in charge of music at the First Congregational Church in Hudson. Corbusier died of a heart attack while dancing at the Hudson Club at the age of forty-nine. According to his obituary he also designed several unidentified churches in St. Louis, Pittsburgh, Orlando, FL, Indianapolis, Ft. Wayne, Toledo, and Massillon.

Frank E. Cudell

Birth/Established May 11, 1844

Death/Dissolved October 25, 1916

Biography:

Franz (Frank) Cudell was born in Aix la Chapelle, Germany. He studied architecture there and left Germany in 1866, initially settling in New York, working in the office of architect Leopold Eidlitz. He came to Cleveland in 1867 where he worked in the offices of local architects. In 1871 he opened his own office, soon forming a partnership with J. N. Richardson under the name of Cudell & Richardson. He was naturalized as an American citizen on June 22, 1871. In 1878 he invented a sewer gas trap. In 1890, because of his health, he turned his interest in the business over to Richardson. He remained active in civic affairs, presenting an alternative to the Group Plan. In 1902 he proposed building a city hall on Public Square. He filed a lawsuit against the City regarding the selection of J. Milton Dyer as the architect for Cleveland City Hall. He bequeathed his entire estate to the City, after the death of his widow in 1937, including his home that has become Cudell Recreation Center, two apartment buildings on West Boulevard, and shares of Cleveland Railway stock. The Cudell clock tower was erected as a memorial to him in 1917.

In 1881, his family moved to the Willson (E.55th Street) and Woodland Avenue area, then known as Rock's Corners. He attended Central High School. He went to work for Brown Hoisting where he earned a scholarship to the Case Institute of Technology. He continued to work there during the summer. He studied at the Ecole des Beaux Arts in Paris. In 1906, the Architectural Record published an article on his work where he was highlighted as one of a growing number of professionally educated architects settling in smaller American cities. Significant architectural talent came out of his office including Frank Walker, Harry Weeks, and Reynold Hinsdale. He also worked for Warner & Swasey for several years.

He lived on East 71st Street until the last few years of his life. He never married, living with his mother until her death in 1923 and then with his sister until her death in 1954. He then went on to live in a rest home in Cleveland Heights. He was not listed as a registered architect in the November 1940 Ohio Architect listing. He died at the age of eighty-seven and is buried in Woodland Cemetery.

Birth/Established 1899

Death/Dissolved 1903

Biography:

This architectural firm was formed by German-born Godfrey Fugman and French-born Emile Uhlrich and was in existence between 1899 and 1903. Buildings by this firm had a very European flair. Notably they included the Art Nouveau J. L. Hudson store and St. Michael's School on Scranton Road. Fugman and Uhlrich developed an alternative to the Group Plan that called for the mall directly north of Public Square, terminating in a railroad station on the lakefront. A rendering of their proposal appeared in the Ohio Architect and Builder. It had a much more European appearance, with a domed City Hall and Public Library. It also had sites for a music hall and art museum.

Biography:

Morris Gleichmann was born in Austria-Hungary and came to the United States with his parents at the age of six. He was educated in the Cleveland public schools. He is listed as a draftsman in the 1884 Cleveland City Directory, eventually working for the architect Edward Ruprect. He was a member of the Forest City Blue Lodge Masons and the Scottish Rite, and politically he was a Republican. He lived in Cleveland at 866 East 105th Street until 1914. George J. Hardway

Birth/Established January 2, 1858

Death/Dissolved March 23, 1929

Biography:

George J. Hardway was active in Cleveland from 1887 until 1905. He was a partner of Ora Williams from 1889 to 1891. The largest share of his work was on residences, although he would occasionally design industrial or commercial buildings. He had also designed houses in Seattle, Washington and Odebolt, Iowa. From the buildings that we know he designed, his homes were often simpler in design. He avoided the Queen Anne style that was prevalent at the time. In 1892 he and Charles Tousley were the editors and publishers of the American Builder. He left Cleveland in 1905 for New York City, where he had an office at 347 Fifth Avenue and lived in Great Neck on Long Island. He died at Great Neck in 1929 at the age of seventy-one.

Charles W Heard

Birth/Established 1806

Death/Dissolved August 29, 1876

Biography:

Charles W. Heard was born in Onondaga, New York. He settled in Painesville and learned the carpentry trade. He married Carolyn Goldsmith, daughter of Master Builder Jonathan Goldsmith in 1830. They moved to Cleveland in 1833, about the time the Ohio and Erie Canal opened and Cleveland experienced its first substantial population and economic growth. It soon passed Painesville in population and opportunity. The first city directory in Cleveland in 1837 lists Charles Heard as a carpenter and joiner. The 1845 directory listed him as a Master Builder. In 1846 and 1847 he was in partnership with carpenter Warham Warner. The 1850 City Directory shows him in the firm of Heard and Porter, architects and builders. That partnership lasted until 1864. He formed a partnership with his son-in-law Walter Blythe that lasted from 1866 to 1871. From 1871 to the end of his life in 1876 he was the principle in the firm of Heard and Sons, when his sons Lucas Allen and Charles W. Heard Jr. joined the firm. He was active in the community serving as a member of the Board of Education and the Board of Alderman.

He lived at 32 Euclid Street. His wife Caroline died on January 9, 1851. They had eight children; the youngest, Lucas Allen, was five when she died. By 1870 the census showed that his real estate was valued at \$80,000 and that his seven adult children and two servants were living with him on Euclid Avenue. He died in 1876 leaving the unmarried children use of his home for seven years.

Death/Dissolved

Biography:

Hubbell and Benes was one of the prominent Cleveland architectural firms from the early 20th century. Benjamin Hubbell and W. Dominick Benes had worked in the office of Coburn and Barnum before they formed the firm of Hubbell & Benes. They had several important commissions including the Citizens Building, the Cleveland Museum of Art, the West Side Market, the YMCA, the Ohio Bell Building, and the Illuminating Building. The firm also designed numerous homes, commercial buildings, and telephone exchange buildings. They were instrumental in the early planning for University Circle. Benjamin Hubbell retired in 1927, but the firm remained in business after the original partners died. In 1960 it was known as Hubbell, Benes & Hoff, with Benjamin Hubbell's son Benjamin S. Hubbell (1897-1988). The Western Reserve Historical Society has an extensive collection of the firm's drawings.

John J Husband

Birth/Established 1820

Death/Dissolved aft. 1895

Biography:

John J. Husband was born in Virginia. He was listed as a builder and architect from 1844 until 1853 in Philadelphia City Directories. He appears in Cleveland City Directories as an architect from 1853 to 1861. Charles C. Miller worked as a draftsman in his Cleveland office. Miller later went to work as an architect in Toledo and Chicago and was the co-author of an architectural pattern book. In 1860 Husband was living alone in the Weddell House. From 1863 to 1890 he is listed as an architect and civil engineer in Baltimore. He had returned to work in Cleveland in 1865. According to newspaper accounts, after the assassination of President Abraham Lincoln, Husband was overheard in a conversation. A gentleman said that the assassination was perfectly horrible. Husband replied, "Some might think so; others might not. For my part I think it a damned small loss." Because of the remarks he was roughed up by a mob. His name was chipped away from the cornerstone of the Cuyahoga County Courthouse. He returned to live in Baltimore where he was still living in 1893. He is not listed in the 1894 city directory. (Thomas) Arthur & Husband dissolved in 1891.

George Kauffman

Birth/Established December 26, 1865

Death/Dissolved April 6, 1940

Biography:

George Kauffman was born in Manchester, Ohio and later moved to nearby Canton. Canton City Directories list him as a carpenter and later as an architect. He moved to Cleveland in 1897. His firm, the Kaufmann Architectural Company, was best known for ornate houses that bridged the Victorian era and Revival styles that were popular in the early 20th century. Concentrations of these houses are found in the Superior Park Subdivision, along Linwood Avenue in Cleveland, and on Cohasset Avenue in Lakewood. He worked with several developers including Clark and Benton, George Graham, and Bernard Schatzinger. Kauffman's later houses lacked the distinctiveness of his earlier homes. He died in Cleveland two weeks after an automobile accident in April 1940 and was buried in Forest Hill Cemetery in Canton.

Birth/Established 1895

Death/Dissolved 1928

Biography:

Wilm Knox and John Elliot moved to Toronto from Chicago in 1888 with an office at 15 Victoria Street. E. Beaumont Jarvis joined the firm in Toronto where it was known as Knox, Elliot & Jarvis. The firm won the competition for the design of the Richardsonian Romanesque Confederation Life office building in 1889. They also competed for and lost the competition for the Toronto Board of Trade. Knox & Elliot moved to Cleveland in 1893. A May 22, 1902 Plain Dealer article highlighted the firm's designs for manufacturing plants. The firm is remembered for its office buildings with Sullivanesque ornamentation, including the Brotherhood of Locomotive Engineers, Rockefeller, and Standard Buildings. These buildings contrasted with the prevalent Beaux-Arts and Neo Classic-style buildings of the day.

* Osborn Engineering Company

Birth/Established 1892

Death/Dissolved Present

Biography:

Osborn Engineering Company, Cleveland's oldest engineering firm, was founded on July 1, 1892, by Frank C. Osborn, formerly the chief engineer for Cleveland's King Bridge Co. Osborn's new company offered a wide range of services, including the designs, plans, estimates, and construction supervision for roofs, buildings bridges, railways, and highways. Such diversity enabled the Osborn Co.- Civil Engineers to survive the severe economic depression of the 1890s. It was incorporated on May 16, 1900, as the Osborn Engineering Company. During its first 4 decades, Osborn built its reputation as the "stadium designers for the Nation". By the time of its selection as the project engineer for Cleveland Municipal Stadium in 1928, the company had designed more than 75 sports facilities, including New York's Yankee Stadium, Boston's Fenway Park, and Chicago's Comiskey Park. Osborn has continued to design stadiums, working on projects for professional sports teams, major universities, racetracks, fairgrounds, high schools, and municipalities. As early as 1959, Osborn Engineering had completed a design for domed stadiums. In 1958, the company was looking for a broader market for its services, particularly as domestic industrial construction and plant expansion decreased. It turned its attention toward domestic firms that were expanding their operations into international markets. The company designed factories for locations in South Africa, France, Saudi Arabia, and South America. This expansion enabled Osborn to recover from a postwar decline; in 1963 it began hiring additional employees. Business remained strong throughout the 1960s. As engineering became more competitive in the 1970s, Osborn expanded its range of services by forming partnerships. In 1971 it created Osborn Engineers Architects & Planners, and in 1974 both Osborn Co. Architects-Engineers and Osborn Co. Consulting Engineers. The company remains based in Cleveland with offices in the Penton Media Building.

Death/Dissolved February 2, 1935

Biography:

Theodore Schmitt was born in Cleveland. His German-born father had been a marshal and later superintendent of police from 1862 to 1892. Smith from 1881 to 1884. He formed the partnership with Israel Lehman in 1885. He lived at 1841 East 82nd Street and had a country home, Eagle Cliff, on Lake Erie. He became active as a gas producer, selling his products to Standard Oil in the later years of his life. He continued working after Israel Lehman's death in 1914 until his own death in 1935.

Levi Tucker Scofield

Birth/Established November 9, 1842

Death/Dissolved February 25, 1917

Biography:

Levi Tucker Scofield (nee Schofield) was born in Cleveland and was raised in a home on Euclid Avenue near East 9th Street. His family later operated the Prospect Place Hotel on the site after which it became the location of the Schofield Building, which he designed. Levi Scofield attended Cleveland public schools, pursuing the study of architecture and engineering. At some point, he dropped the "H" from his name. In 1860 he moved to Cincinnati. He served in the Ohio 113th Infantry, rising in the rank to First Lieutenant and Captain. He wrote "The Retreat from Pulaski to Nashville, Battle of Franklin, Tennessee, November 30, 1864" which was published in 1909. After the war he returned to Cleveland. In 1867 he married Elizabeth C. Wright, who was prominent in local society and philanthropic circles. She was president of the YWCA, the Phyllis Wheatley Association, and organized the Cleveland Vocal Society.

Levi Scofield is remembered as the architect of large Victorian era institutions that included the Asylum for the Insane in Athens and Columbus, Ohio, the North Carolina Penitentiary, the Ohio Penitentiary in Mansfield, and the Cleveland House of Corrections. His firm designed five Cleveland Public Schools between 1869 and 1883. He devoted seven and a half years, without compensation, to the Cuyahoga County Soldiers and Sailors Monument, and contributed over \$57,000 of its total cost. He was the first Cleveland architect taken into membership in the American Institute of Architects and was a friend and golfing partner of John D. Rockefeller.

Scofield was the sculptor of "These are my Jewels," a Civil War Monument installed at the Columbian Exposition in Chicago in 1893, later moved to the grounds of the Ohio State Capitol. The Schofield Office Building on the southwest corner of Euclid and East 9th Street, built in 1900, was built on the Schofield homestead and was originally owned by Levi Scofield. He had two sons, William Marshall Scofield (1868-1942) and Sherman Wright Scofield (1876-1942) who became members of his architectural firm. The Scofields were members of First Baptist Church and are buried in Lake View Cemetery.
